## Comprehensive TREE CARE SERVICES

First Choice Tree Service is your trusted partner for comprehensive tree care solutions. With accreditation from both the International Society of Arboriculture (ISA) and the Tree Care Industry Association (TCIA), we proudly deliver safe, professional services that meet and exceed today's industry standards.

### Canopy Reduction

Canopy reduction is a strategic pruning method that decreases a tree's height and spread, reducing stress on limbs, minimizing risk, and promoting healthy growth.

### Clearance Pruning

Clearance pruning strategically removes branches that interfere with structures, utilities, and traffic areas. Our team specializes in this type of pruning, ensuring proper clearance while maintaining tree health, safety, and structural integrity.

### Palm Tree Specially Pruning & More!

We offer specialty palm tree pruning services, including palm skinning, diamond cutting, and sculpting. Our highly trained crews specialize in safe palm pruning techniques and are extensively trained in self-rescue and tree-climbing rescue procedures to ensure the highest level of safety and professionalism on every job.

### Water Jet OR Stump Grinding?

### Why Tree Removals are Our Specialty

When tree removal is the only option, an extensive root system may remain. At First Choice Tree Service, we offer two effective solutions for complete tree removals—stump grinding and water jetting—to safely remove roots and prepare the area for new trees or plantings. Regardless of the size or complexity of the root system, our team can remove it with precision. Our water jet system includes vacuum recovery technology, allowing us to work safely around irrigation lines, electrical conduit, and other utilities without causing damage.

### Highest Success Rate for Tree Relocation/Transplants

Did you know First Choice Tree Service has one of the highest success rates in tree relocation and transplanting? Our extensive fleet, state-of-the-art equipment, and Plant Health Care experts work together to maximize tree survival before, during, and after relocation. Whether you need to move an existing tree or transplant a new one, no project is too big or too small. From high-profile resorts to city and county parks, our experience speaks for itself. Trust your trees to the experts.
